Peter,

The last comment on the benefits requests the peer review. The peer review report and our responses are attached. I'm sending them as Word files in case you want to change the headers. Thanks!

Rebecca

Subject: EO 12866 Review: Formaldehyde Implementation Stds NPRM - Additional Interagency Comments

All, I received some additional comments yesterday from OMB regarding both the EA and the rule from an interagency review who will not be able to participate in the discussions today.

On a quick review, the comments on the rule do not appear to difficult one to respond to, never mind whether the reviewer reacts favorably. They deal with:

- stockpiling,
- chain of custody requirements,
- record retention periods,
- aminates, and
- ULEF testing requirements.
